About Me

Backend Software Engineer with a B.Sc. in Computer Science and practical experience in C# + python and .NET MVC, including building and deploying a live SaaS scheduling platform used by real clients. Skilled in backend development, system design, and API integration, with a strong focus on clean code and maintainability. Experienced in agile team environments and passionate about solving real-world problems through scalable, efficient software solutions.

EXPERIENCE

Software Engineering - MindoLife

2024 - Present

Collaborated with a large development team to maintain and enhance an existing IoT system. Contributed to internal tools with a focus on scalability and performance. Gained practical experience in agile development, real-world debugging, and production-level coding, working with C# and Angular.

Software Engineering - [DoJourney](#)

2023 - 2025

Developed a complete SaaS scheduling platform using ASP.NET MVC with a focus on real-world functionality. Built both the backend logic and the user interface using HTML, CSS, and JavaScript. It was sold to one of the active clients.

NOC Engineer - Au10tix, Hod-Hasharon

2023 - 2025

Monitored and maintained network infrastructure to ensure high availability and performance. Responded to incidents and collaborated with cross-functional teams to resolve complex issues while maintaining documentation.

EDUCATION

B.Sc. in Computer Science

2022 – 2025 (Graduated)

Gained a solid foundation in software engineering, programming languages, and system design through a combination of theory and hands-on projects.

SolarFlare Angular + Backend in C# Program:

2024 - 2025

Focused on full stack development in Angular and agile teamwork in large-scale app delivery.

AWS re/Start Bootcamp:

2022 - 2023

Completed intensive training with a team deployment project using AWS S3, EC2, and Docker.

PROJECTS

Car Wash Dashboard in *SolarFlare Program* (Angular, REST APIs)

[Link](#)

Developed a car wash management dashboard in a 3-member Agile team using Angular. Implemented key features and integrated with a live backend API, gaining hands-on experience in API integration and frontend architecture.

[DoJourney](#) - SmartScheduler (ASP.NET MVC, Twilio API)

[Link](#)

Built an end-to-end appointment scheduling and CRM system that sends automatic WhatsApp notifications via Twilio. Streamlines salon operations. Live MVP in use by two clients.

Encrypted File Transfer System (C++, Python)

[Link](#)

Created a secure cross-network file transfer system using RSA encryption.

SKILLS

Languages & Frameworks:

C#, ASP.NET (v8), C/C++, Python, Java, Entity Framework, .NET Core Web API, JavaScript/TypeScript, HTML/CSS, Angular

Tools & Platforms:

AWS (S3, EC2), Docker, Linux, SQL/NoSQL Databases, Twilio, Git, Linux

Core Competencies:

Problem Solving, Object-Oriented Design, Data Structures & Algorithms, System Architecture, Adaptability, Attention to Detail

Languages

English - Hebrew
